

This workshop would be suitable for anyone wishing to advance their Beauty Therapy skills to include dermal rolling/micro skin needling. We have designed an intense, comprehensive 1 day workshop with hands-on training that will allow you to introduce micro skin needling services to your current business. Adding clinical level skin needling to your practice enables you to offer clients a wider variety and choice of treatments. This course is designed to teach you the theory, practical application, safety protocols and patient aftercare. This workshop can be delivered on weekdays or weekends to suit as required.

advanced skin

Advanced Skin Workshop: Micro Skin Needling / Dermal Rolling

Micro-needling and dermal rolling techniques, skin anatomy, client selection, contraindications, treatment of complication, aftercare, home treatments and real world advice from practicing instructor.

Live demonstration and intensive hands on instruction.

Cost \$750 and everything required to complete the course will be provided to you. Includes 1x clinical dermal roller and 1x homecare dermal roller for each participant plus a tube of topical anaesthetic

There is a \$250 nonrefundable deposit to secure your spot in to course and balance of payment is due prior to the day you are attending.

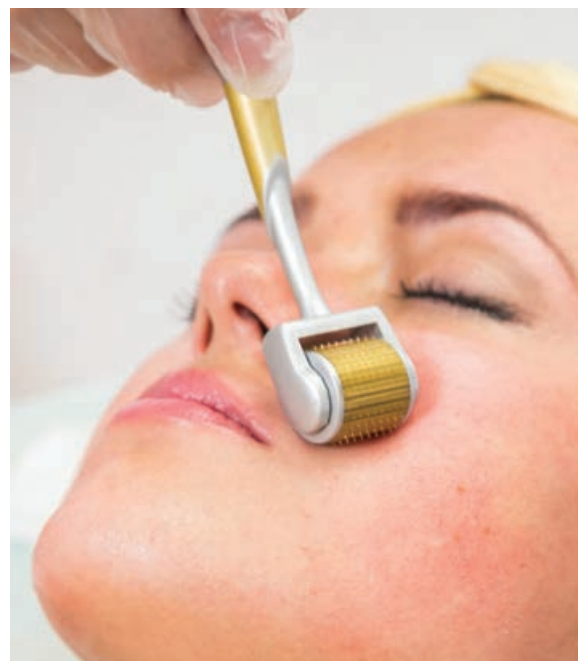

On completion of the Advanced Skin Workshop students will receive a Statement of Participation.

- Treatments
- Aftercare for micro-skin needling procedures
- Treatments for complications
- Identifying indications, contraindications
- Complimentary treatments and products.

COURSE PREREQUISITES

Beauty Therapy at a Certificate IV Level or above, or be a registered nurse with a sound knowledge of skin biology to enrol in this course.

This workshop would be suitable for anyone wishing to advance their Beauty Therapy skills to include paramedical advanced chemical peels. We have designed an intense 3 day practical hands on workshop with extensive hands-on training, in the application of chemical peels. Adding physician strength chemical peels to your practice enables you to offer clients a wider variety and choice of treatments. Chemical peels are one of the top 5 nonsurgical skincare treatments performed throughout the country and work as a complimentary treatment alongside some cosmetic laser services. This workshop gives you the opportunity to treat a wider variety of clientele's skincare concerns and earn more income! The course runs over 3 days once a week for 3 weeks and can be delivered on weekdays or weekends to suit as required.
